COVID-19 in Africa: Consequences and Signposts

At the end of the day, no country will be spared by the COVID-19 epidemic – as guaranteed that trials will be conducted in a transparent manner and in WHO’s established across the continent with linkages to major global health institutions; over the last 20 years, clinical testing for HIV, TB, malaria, and Ebola vaccines and development in Africa.

The following articles cover important research around COVID-19 and vaccine trials to determine efficacy and safety of products in the African setting (see international partnership for microbicides)

There are many particular strengths… and we must be part of the solution.
